

PRASHANT SHAH

551-217-9864 | shahp0021@gmail.com | prashantshah.tech | linkedin.com/in/prashant210 | github.com/Prashant002-1

AI/ML engineer and solo founder who builds full agent harnesses and owns AI systems from data and model integration through evaluation and cloud operations. Delivered a live multi-tenant AI platform, enterprise AI-assistant integrations, clinical analytics systems, and PyTorch/Vertex AI recommendation research. See prashantshah.tech for production systems and AI research.

EXPERIENCE

Founder & Engineer

May 2026 - Present

Atlas LMS 

Remote

- Founded and shipped a live multi-tenant TypeScript/PostgreSQL AI platform, owning product, agent architecture, full-stack delivery, and cloud operations from definition through production.
- Built a full agent harness that combines patterns from multiple runtimes with persistent sessions, memory, dynamic plugin discovery, typed tools, retrieval, and multi-provider LLM routing.
- Operate containerized GCP infrastructure with private Cloud SQL, TLS, encrypted secrets, monitoring, deployment verification, rollback, and recovery.

Software Engineering Intern

May 2025 - Aug 2025

Trimble Inc.

Princeton, NJ

- Delivered a C#/.NET manager for AI-assistant workflows across TMW Suite, environment databases, REST APIs, and authentication boundaries, consolidating service configuration and payload routing into one editable workflow.
- Traced service data through AWS S3, RDS, CloudWatch, Datadog, and SQL; added validation that surfaced stale or conflicting configuration before downstream failures and reduced manual troubleshooting.

Software Engineering Intern, Business Analytics

Jun 2024 - Aug 2024

Novartis Pharmaceuticals Corporation

East Hanover, NJ

- Delivered PostgreSQL and Azure Functions services powering BI and resource-management applications across 100+ clinical initiatives, supporting project, budget, and staffing planning in Site Operations.
- Built data-processing and quality checks across reports and operational handoffs, reducing recurring reporting from two days to hours and making project, budget, and staffing data traceable.

Data Engineer, Data & Workflow Systems

Sep 2025 - Jun 2026

Ramapo DMC – Center for Food Action

Mahwah, NJ

- Built a Python/PostgreSQL data platform that turns barcode and manual donation intake into consistent records for pricing, inventory analytics, reporting, and PantrySoft integration.
- Extended the AI-maintained registry with agent-callable tools, CLI commands, structured APIs, and REST pipelines that keep PantrySoft data synchronized and failures traceable.

Undergraduate Researcher, AI/ML Systems

May 2025 - May 2026

Ramapo College of New Jersey

Mahwah, NJ

- Built and owned the full PyTorch/Vertex AI recommendation pipeline from source-data ingestion and heterogeneous graph/embedding construction through Graph Transformer training, retrieval, composite ranking, cloud experiment orchestration, evaluation, and ablation across 1,600 controlled queries.
- Designed Sentence-BERT/graph ranking for content-intent conflict; found emotion edges 2.3x more necessary under conflict, won Best Research Award, and earned NGEN AI 2026 acceptance for Springer.

EDUCATION

Ramapo College of New Jersey

Mahwah, NJ

B.S. Data Science & Computer Science (Double Major) | Minor: Math | GPA: 3.8/4.0

May 2026

Recognitions: Best Research Award, ICPC NY Honorable Mention, Presidential Scholarship

SKILLS

Programming: Python, TypeScript/JavaScript, C#, SQL, Java, R, Bash

AI & ML: PyTorch, PyTorch Geometric, Sentence-BERT, scikit-learn, Vertex AI

Agent Systems: Vercel AI SDK, Model Context Protocol (MCP), agent harnesses, plugins, RAG, pgvector

Backend & Cloud: FastAPI, .NET, REST APIs, PostgreSQL, AWS, GCP, Azure Functions, Docker, CloudWatch, Datadog
